YOU

what changes would you do to my porfolio?

AI ADVISOR

I recommend diversifying your portfolio to manage risk and enhance potential returns:

- Consider investing more in stocks to balance your crypto-heavy allocation.
- Explore growth opportunities in different sectors or regions.
- Review and possibly rebalance your assets periodically to align with your financial goals.
- Research and consider adding other asset classes like bonds or real estate for further diversification.
- Keep track of market trends and news to make informed investment decisions.

Quick questions:

"How diversified is my portfolio?"

"How can I grow my net worth faster?"

"Should I rebalance my assets?"

"What are my biggest risks?"
